

Supernova (Amulet, Vol. 8)

by Kazu Kibuishi

Throughout the world of Alledia there are people known as stone keepers. One stone keeper in particular, Emily, has to battle a voice in her head that wants to control her. Meanwhile her brother Navin goes on an off world mission to get Gadoba tree seeds.

The book is the eighth installment in a graphic novel series called Amulet. The author of this book has written a few other books and series. He has written the Explorer series. He has also written a book called Flight, and a book called Copper.

The book takes place in two places. Half of the book takes place on a planet called Alledia, the other half takes place on a planet called Typhon. Half of the book follows a girl named Emily and her journey on trying to control the voice in her head. The other half of the book involves Emily's brother on a space mission.

One of the main reasons I liked this book was the plot. I had read the other books in the series before this one and liked the plots a lot. This book in particular has some of the greatest plot points. One part of the plot I liked a lot was the conflict between Emily and her inner self. The pacing in this story doesn't feel really slow nor does it feel rushed, and the book gives ample time to each of the scenes. Throughout the book, Emily and her brother Navin develop a lot throughout the perspective switches, more so than in the other books in the series.

I would recommend this book to people who are fans of fantasy and sci-fi. It fits those two genres really well, and it has great pacing and a good story. One main reason I would recommend this book to fantasy fans is the mythological creatures and the magic that the stonekeepers use. One main reason I would recommend it to sci-fi fans is the futuristic technology present in the book, along with all the robots in the story.

-Nathan, Age 13
